##### **The System of Education in Russia**

The system of education in Russia is very much the same as in other highly developed countries. It is based on the Soviet education, but it has been gradually changing since the creation of the new Russian state.

There are nurseries and kindergartens for little children aged from 2 to 6. The level of kindergartens has become considerably higher in recent years. Children play games, go for walks, have regular meals there. But the lessons of reading, arithmetic, drawing and other subjects have become more complicated than they were in the kindergartens ten years ago. There are the kindergartens where children learn foreign languages. At the age of 6 or 7 Russian children go to secondary schools. Our children are also streamed into different forms according to their abilities. There are forms A, B and so on. The forms under the first two letters of the alphabet are for the cleverest pupils. The level of education in Russian secondary schools is rather high. Children receive primary education during the first three or four years. Then they enter the

middle school, usually without any examinations. The pupils of the middle schools study Russian and foreign languages, Russian literature, algebra, geometry, physics, chemistry and biology. They have their final examinations in the ninth form. Then the pupils may leave school and enter some professional college or receive full-time secondary education in the tenth and eleventh forms. The program of the last two years is the most complicated one. Besides the subjects mentioned above, it often includes trigonometry, organic chemistry and astronomy. Pupils get the necessary knowledge for entering the universities and institutes. There are some special schools where pupils have advanced programs in physics, mathematics or foreign languages. Every city in Russia has at least one university and several institutes. The oldest Russian universities are the Moscow State University, the University of St. Petersburg and some others.

**(ПЗ)№ 3 Дайте ответы на вопросы**

1. Is the system of education in Russia highly developed?
2. What establishments are organized for children from 2 to 6?
3. What do children do in the kindergartens?
4. What subjects do they study?
5. Did you learn any foreign language in the kindergarten?
6. What age is the compulsory school age in Russia?
7. Are Russian children streamed into different forms as in British schools?
8. How many years does the primary school include?
9. Should children pass any examinations entering the middle school?
10. What subjects do pupils of the middle school study?
11. When do they pass examinations?
12. Can pupils leave school after the ninth form?
13. How many years do they attend school to receive full-time secondary education?
14. What subjects do they study during the final two years?
15. Are there any special schools with advanced programs in your native city?
16. Are there many higher educational establishments in Russia?
17. Is there a university in your native city?

**Education in Great Britain: Schools**

In Britain it is compulsory for everyone between the ages of 5 and 16 years to receive some officially recognized form of schooling, though most secondary schools continue to provide education until the age of 18. The vast majority of pupils attend state schools, which are absolutely free (including all text books and exercise books), but there are also about 500 private schools providing secondary education. The most famous of these schools are Eton and Harrow. There is no statutory age at which students change from primary to secondary school, nor are schools "specialized" — pupils choose from the numerous subjects taught in their particular school. The recently introduced National Curriculum has made it compulsory, however, for three core subjects — English, mathematics, and science — and seven other foundation subjects — technology (including design), history, geography, music, art, physical education, and a modern foreign language — to be included in the curricula of all pupils.

Passage from one academic year to the next is automatic. After a two-year course, usually from 14 to 16 years of age, most pupils take their General Certificate of Secondary Education (GCSE), assessed on the basis of a mixture of course work and a written examination, in individual subjects. Pupils obtaining at least five passes at GCSE can then specialize for two years (usually from 16 to 18 years of age) in two or three subjects, in which they take the General Certificate of Education Advanced level (A-level) examination. This is used as an entrance qualification for university (minimum two passes) and other types of higher education, as well as for many forms of professional training.

### **Education in Britain**

In England and Wales compulsory school begins at the age of five, but before that age children can go to a nursery school, also called play school. School is compulsory till the children are 16 years old. In Primary School and First School children learn to read and write and the basis of arithmetic. In the higher classes of Primary School (or in Middle School) children learn geography, history, religion and, in some schools, a foreign language. Then children go to the Secondary School. When students are 16 years old they may take an exam in various subjects in order to have a qualification. These qualifications can be either G.C.S.E. (General Certificate of Secondary Education) or "O level" (Ordinary level). After that students can either

leave school and start working or continue their studies in the same school as before. If they continue, when they are 18, they have to take further examinations which are necessary for getting into university or college. Some parents choose private schools for their children. They are very expensive but considered to provide a better education and good job opportunities. In England there are 47 universities, including the Open University which teaches via TV and radio, about 400 colleges and institutes of higher education. The oldest universities in England are Oxford and Cambridge. Generally, universities award two kinds of degrees: the Bachelor's degree and the Master's degree.

The system of education in the USA varies greatly from state to state. School education in so called state public schools is free. Parents are free to choose any public school for their children. Although there are a lot of private schools, mainly religious, and parents have to pay for them. A school year starts in September and ends in June. It is divided into three terms or four quarters. American children start attending elementary schools at the age of 6. They continue their studies for eight years there (8 grades). Their basic subjects in the curriculum at this stage are English, Arithmetic, Natural Science, History, Geography, Foreign Language and some others. After that pupils may enter a Senior high school or if they go to a 5- or 6-year elementary school, they then attend a 3- or 4-year Junior high school, and then enter a Senior high school. Pupils graduate from high schools at the age of 18. The high schools (also known as secondary schools) are generally larger and accommodate teenagers from four or five elementary schools. During the school year the students study four or five selective subjects according to their professional interests. They must complete a certain number of courses to receive a high school diploma or a certificate of school graduation. In order to develop social skills and encourage students' participation in extracurricular activities every high school has an orchestra, a music band, a choir, drama groups, football, basketball and baseball teams. School becomes the centre of social life for students. At American colleges and universities young people get higher education. They study for 4 years and get a Bachelor's degree in arts or science. If a student wants to get a Master's degree he must study for two more years and do a research work. Students who want to advance their education even further in a specific field can pursue a Doctor degree. The most famous American universities are Harvard, Princeton, Stanford, Yale, Columbia Universities.

### **(ПЗ) №1 Переведите на английский язык**

Я учусь в техническом училище, и у меня не очень много свободного времени. Но я всегда нахожу время на мое увлечение. Я очень люблю фотографировать. Недавно родители подарили мне дорогой и очень хороший фотоаппарат, и я провожу много времени в поисках интересных кадров. Я люблю фотографировать своих друзей. Когда мы идем в поход или гуляем по городу, у меня всегда с собой мой фотоаппарат. У меня уже есть четыре альбома фотографий, и друзья любят рассматривать их, когда приходят ко мне в гости.

I can say that my hobby is dog training. I have a dog Jerry and we are best friends. Jerry follows all my commands and performs some simple tricks. We understand each other perfectly. I spend 2-3 hours a day training Jerry and it takes me a lot of effort but it's so much fun! Dogs are very devoted and understanding creatures and it is a great pleasure and entertainment to communicate with them. When Jerry is disobedient I never punish him but ignore his bad behaviour. And I often give him sweets and cookies as a reward.

2. Adam, 72, pensioner

I started collecting milk-jugs 12 years ago. At first my collection was small but today I have more than 200 items in it. I like drinking tea with milk and I have all sorts of milk-jugs in my collection. Most of them are attractively displayed on the shelves in my living-room. My relatives and friends know about my passion and they often add to my collection. My granddaughter often travels abroad on business and for pleasure and she always presents milk-jugs to me. I also collect antique clocks and icons, but my collection is still very small.

3. Daniel, 63, cook

My favourite pastime is amateur astronomy. When a school boy I liked physics and astronomy and dreamt of becoming astronaut. Observing and studying celestial objects is very interesting and romantic. Viewing the night sky you can see stars, the Moon, planets, comets and meteor showers. Of course you won't see much looking at the sky with the naked eye, that's why I use optical telescopes. I often keep records of my observations and share useful information with other amateur astronomers. Now my dream is to discover a new comet and to make some useful contribution to astronomy.

4. Simon, 25, messenger

Parkour teaches you to move quickly and efficiently and to overcome obstacles such as concrete walls, high fences or rocks. It has no set of rules or competitiveness. Parkour helps

me develop my body and mind and gives me much energy. I learn to trust myself and to be strong. Parkour teaches me to overcome everyday difficulties and to approach problems differently. My friends and I practice in parks and abandoned structures. We try to avoid injuries but of course everything happens. You need no particular equipment: just a T-shirt, light trousers and comfortable athletic shoes. I think Parkour has changed my life and my attitude to everything.

### **A Hobby Makes Your Life Much More Interesting**

Our life would be hard without rest and recreation. People have quite different ideas of how to spend their free time. For some of them the only way to relax is watching TV or

drinking beer. But other people use their spare time getting maximum benefit from it. If you enjoy doing some activity in your free time, than you have a hobby. A person's hobbies are not connected with his profession, but they are practiced for fun and enjoyment. A hobby gives one the opportunity of acquiring substantial skill, knowledge and experience. A hobby is a kind of self-expression and the way to understand other people and the whole world. A person's hobbies depend on his age, intelligence level, character and personal interests. What is interesting to one person can be trivial or boring to another. That's why some people prefer reading, cooking, knitting, collecting, playing a musical instrument, painting, photography, fish keeping or playing computer games while others prefer dancing, travelling, camping or sports. A hobby plays a very important educational role, makes you stronger physically and mentally, helps you escape from reality, improve your knowledge, broaden your mind, develop your skills and gain a better understanding of how the world works.

**The Olympic Games**

The Olympic Games have a very long history. They began in 777 BC in Greece and took place every four years for nearly twelve centuries at Olympia. They included many different kinds of sports: running, boxing, wrestling, etc. All the cities in Greece sent their best athletes to Olympia to compete in the Games. For the period of the Games all the wars stopped. So the Olympic Games became the symbol of peace and friendship. In 394 AD the Games were abolished and were not renewed until many centuries later. In 1894 French Baron Pierre de Coubertin, addressed all the sports governing bodies and pointed out the significance of sport and its educational value.

Two years later the first modern Olympic Games took place. Of course, the competitions were held in Greece to symbolize the continuation of the centuries-old tradition. In 1896 the International Olympic Committee was set up. It is the central policy-making body of the Olympic movement. It is formed by the representatives of all countries, which take part in the Olympic Games. Summer and Winter Games are held separately

T: What are you doing, Liza?

L: I'm looking at the holiday brochure. There are four hotels in the town, but I can't decide which one we should stay.

T: Let me see. Why don't we stay at the Gold Plaza? It looks the most comfortable of the four, and it's not as expensive as the Sunshine.

L: But, it's near the main road and I think it'll be too noisy to live there.

T: So, what about the Magic Castle Hotel then?

L: I don't know. It looks dirtier than the other hotels.

T: But it's the cheapest and it's probably quieter than the Gold Plaza. Look! The brochure also says that it's got friendly staff.

L: Okay! Let's stay at the Magic Castle Hotel. I'm sure it will be fine.

When a young man starts to think about a future career, he imagines a very glorious picture. But a person gets older he faces real life with its problems. After graduation from the Institute young specialists don't have many variants. The most common one is to get work as a manager.

As for me, I don't want to spend all the time in a stuffy office full of computers and printers. I believe that I will never impose unnecessary goods, compose boring reports, and be on phone all day. I understand that modern life could be more difficult without managers, but this kind of work not for me. We have one life and we ought to spend it wisely. I'm sure that in the future I'll ask myself what I've achieved. I believe that any person is born to fulfil some goals, which nobody else, but himself, could define. So as sooner I define my goals as happier I will be. I'm leaving school at the end of the spring and I always think about an educational institution which I need to choose. I think the ideal option for me will be any Choreographic Academy. I have been dancing all since I was five and I can't imagine my future life without choreography. Dancing is the best way to express myself, to capture my emotions and thoughts to people. I adore dancing. When I'm engrossed in creation, I don't think about my school problems and everyone around. I call it "inspiration". I feel that a real connection between me and the Universe. So I just pick up some ideas and express them through dance using my body and emotions. If I tell my friends or parents about this plan, perhaps they will say that I am aspiring to be famous. By no means, fame is a heavy burden. There is an important difference between the desire to be a famous artist and the desire not to be forgotten dancer. I don't think the people of art are exceptional. If an architect creates buildings that will stand for many years, people will be thankful for his great work. If the writer's novels are read in three hundred years, it will be wonderful. If a dancer's creation will be remembered next generations, he will live in human hearts. Any career should make the human who has chosen it satisfied. Otherwise, working routine will be an excruciation and nothing else. I really don't want to write reports and answer the phone sitting in the office all day. I want my profession to make me happy, and I want to see happy people around me.

Now I have to think about my entrance exams. They are not so easy. I believe that my dream to become a great dancer will come true and I will be able to share the pleasure of dancing with other people.

No more infrastructure investments or time spent adding new servers, partitioning silos – none of that mess. With the cloud, you basically have access to unlimited storage capability and scalability.

**Control and Reliability**

The biggest fear of cloud computing is founding its major benefit – the ability to outsource the IT burden to a specialized vendor or provider. Sure it sounds great, but with a move to the cloud you do give up the in-house control of a traditional IT department.

### **Security, Privacy and Compliance**

Security can also be a concern in the cloud, particularly if you manage confidential data like customer information. Compliance in the cloud may also become an issue, which may require deploying a private cloud if you do have to secure private data.

### **Backup and Disaster Recovery**

Those days of tape back-up are long gone. Most cloud providers across service types and platforms offer comprehensive backup and recovery capabilities.

### **Compatibility**

Making sure every existing tool, software and computer is compatible with the Web based service, platform or infrastructure. While onsite IT may have a little more control in managing integration and compatibility, it is often "what you see is what you get" in the cloud.

### **Mobility**

Your cloud, anywhere. Whether it's your development platform, suite of office tools or custom content management system – cloud mobility enables access anywhere with a Web connection (just about).

### **Unpredicted Costs**

Sure, the cloud can substantially reduce staff and hardware costs, but the price could end up being more than you bargained for. Migrating to the cloud is also an understated cost, and making sure the current systems that support your business while moving to the cloud could raise operating costs substantially.

### **Contracts and Lock-Ins**

Traditional IT could be downsized, upsized, contracted-in and otherwise controlled by you. On-site hardware, software, infrastructure and platforms always carried some obligations, but now the cloud service provider, for the most part, has all the decision power. Vendor lockin is also a major issue – as it was with old IT – and this could add up to cost and performance disadvantages later.

### **Cost Efficiency**

Aside from storage and infrastructure costs, just think about all the other costs you can minimize with cloud services – updating and managing software or applications, hiring and training new staff and even decreased on-site energy costs.

### **Enable IT Innovation**

Probably the most understated benefit of the cloud – it is reshaping IT into a proactively innovative bunch that focuses a lot less on manual system administration, and a lot more on improving the technology. From integration, mobility to even user personalization, giving your IT the cloud can make their jobs much easier – and more enjoyable.

### **Тема 8. Правила телефонных переговоров**

#### **(ПЗ) № 1 переведите текст**

One of the most important practices to which office workers may face on a daily basis, is the ability to negotiate (ability to negotiate). What is the talks (negotiations)? The idea is that this solution to the conflict (resolution of conflict). We are starting negotiations (enter negotiations) in order to start (to start) or continue (continue) the business relationship (relationship), and to resolve the issue (resolve an issue). Even when we act on your first job, or start a career (begin career), we learn to negotiate. For one talks begin with a discussion of cash benefits (allowance), issued by the parents, for another - with a dispute with a brother or sister about what TV show would look. Some people are strong negotiators from nature (naturally stronger negotiators) and are able to more easily achieve the desired result. Not being able to negotiate, people stop relations (break off relationships), leave from work (quit jobs), or deliberately avoid conflict situations

#### **(ПЗ) № 2 Переведите правила переговоров**

- 1) Always try to continue the negotiations for at least 15 minutes. If negotiations are held in less time, the parties are unlikely to form a correct opinion about each other. Usually, the seriousness of the negotiations determines the period of time necessary for discussion. Approximately 90% of the questions are solved in the last 10% of discussion.
- 2) Always offer the other side to speak first. This is especially important if you ask the chief to raise wages. Your boss may reevaluate the situation and offer you more than you are going to ask.

3) Always show respect and listen to what your opponent says. This is important, even if he or she does not exhibit the same courtesy towards you. Do everything to remain calm and courteous, even if the other party shows signs of irritation or anger. Remember that some people deliberately try to intimidate or provoke you.

4) Confirm that says the opposite side. Everyone likes to know that what they say - it is important. If the other party starts talking first to use this advantage to remember what you heard. Be aware of important ideas before you present your arguments.

5) Keep track of your and other people's gestures. We will help you to deal with sign language later. To restrain from negative sign.

### ***SPORTS IN BRITAIN***

Sports play an important role in the life of the English people. Such national British sports as football, golf, cricket, table tennis, lawn tennis, steeplechase, racing, darts are popular among the British. They are proud that many sports originated in their country and then spread throughout the world.

Football, the most popular game in the world, is of two kinds in Britain: association football (soccer) and rugby. Soccer, played almost in all countries, remains one of the most popular games in Great Britain. Rugby football originated at Rugby public school. In this game players carry the ball. Two teams of 15 men play rugby with an oval ball.

Golf, one of the popular sports in Britain, is from Scotland.

Englishmen are fond of cricket. Cricket is popular in schools, colleges, universities. Test matches with other countries take place regularly.

Table tennis is from England, it was invented in 1880. But the British players are not lucky in tennis international championships.

Everyone in the world knows Wimbledon as the centre of lawn tennis. Millions of people watch the Championships on TV live and at full length.

Steeplechase, a cross country running, has a great popularity in European countries. The first cross country race was in 1837.

Englishmen like all kinds of racing. Horse-racing, motor-car racing, boat-racing, dog-racing, donkey-racing are very popular in England.
